(and other things you ought to know)

Computer Lab changes

The Board of Directors is pleased to announce the opening of the computer lab for the personal use by the club membership.

Please note: this is not a help session!!!!

We're going to try it from 1 until 3 PM Mondays and see how it goes. If the demand is there we'll make more time available.

These will be monitored sessions. That means there will be a club member responsible for opening the lab and making sure all the equipment needed is working properly or letting system admin know if something is not. So they will be oriented to the lab for those kinds of issues but they will not be there to help with personal computing issues.

If you take advantage of this please send an email to the help desk (scovcomputer1@gmail.com) letting us know. That will help us know to continue and will provide another channel for communications.

Class schedule

You've given us a good list of the types of classes you'd like to see so we're beginning work on making those available. We'd like to get them posted out on the calendar for the entire season so we know what we're doing and you have plenty of advance notice on what's to be presented.

Instructors needed

Please help us out here. Many of you have great computer skills and the club would like the benefit of your knowledge. Please contact either Mary

Kaczmarski or Paul Sherwood to express your willingness to instruct - or send an email to the help desk (scovcomputer1@gmail.com).
